TITLE : COMPACT TELEPHONE SET

ABSTRACT : **PURPOSE:** To provide the compact-shaped telephone set with which makeup is enabled during speaking by providing a transmitter/receiver, plural push buttons and illuminator at the main body of the telephone set and providing a lid body equipped with a mirror inside so as to be freely opened/closed for covering the surface of push buttons.

CONSTITUTION: In the case of make-up or speaking, a lid body 2 is opened, and a mirror 4 or push buttons 5 are revealed. In the case of make-up during speaking, a main body 1 of the telephone set is put at any suitable place, voice is generated while watching the mirror 4, the voice is transmitted from a transmitter 6 to the opposite side, and the voice from the opposite side is heard by a receiver 7. When the surrounding is noisy or it is not desired that the other person listens to the speaking, an earphone 8 is used. As a result, since both hands can be used during make-up and an illuminator 11 is turned on, the work for putting on lipstick or the like is easily performed even at any comparatively dark place. Further, the work for making notes during speaking can be easily performed by using a small article 14 as a pen and while using the illuminator 11, notes can be made or a telephone directory can be investigated even at the dark place.
